Not all birds build nests with sticks and have good manners. Some construct nests with their own saliva, while others use vomit as a defense!

Sound strange? In *Spit Nests, Puke Power, and Other Brilliant Bird Adaptations*, curious kids ages 5 to 8 discover many of the unique adaptations of birds. Stories of these brilliant adaptations cultivate deeper discussions about the crucial environmental science topic of adaptations. Using an easy narrative tone and vivid illustrations, this book is perfect as a read aloud or an early reader. A limerick poem at the beginning of the book offers a language-based entry into science details. Layered text and back matter provide further information and encourage readers to dive deeper into the world of unique bird adaptations.
