

ASK MORE QUESTIONS

What kind of life could be on Titan?

What else did Cassini find?

Try a BIG QUESTION:
How does studying space affect us here on Earth?

SEARCH FOR ANSWERS

Search the library catalog or the Internet.
A librarian, teacher, or parent can help you.

Using Keywords
Find the looking glass.

Keywords are the most important words in your question.

If you want to know about:

- life on Titan, type: TITAN LIFE
- Cassini, type: CASSINI MISSION

FIND GOOD SOURCES

Here are some good, safe sources you can use in your research.
Your librarian can help you find more.

Books

Our Solar System
by Giles Sparrow, 2018.

Saturn by Vanessa Black, 2018.

Internet Sites

NASA: Cassini Mission
<https://solarsystem.nasa.gov/missions/cassini/overview/>

NASA is the U.S. government's space program. They are a great source for space information.

PBS Learning Video: Life on Titan?
<https://www.pbslearningmedia.org/resource/nvfl.sci.space.titan/life-on-titan/>

PBS is public television. Public television has great learning videos without many ads.

Every effort has been made to ensure that these websites are appropriate for children. However, because of the nature of the Internet, it is impossible to guarantee that these sites will remain active indefinitely or that their contents will not be altered.

SHARE AND TAKE ACTION

Join an astronomy club.
If there is not a club, start one!
See if a teacher will help.

Ask a parent to use a free stargazing app on their cell phone.

Some apps show you what you are seeing in the sky just by pointing the phone at it!

Go to a planetarium.
These are like movie theaters with shows about space.
